**Oxford Fertility**

Oxford Fertility is part of The Fertility Partnership which is a group of national and international clinics specialising in IVF with some of the highest success rates in Europe.

**The Role**

Exciting opportunity to join the nursing team at Oxford. The post-holder will be one of a group of specialist nurses working within the Assisted Conception Unit where treatments offered range from Ovulation Induction, Donor Insemination to Assisted Conception Techniques. These include Intra-Uterine Insemination, In Vitro Fertilisation, Intra-cytoplasmic Sperm Injection, egg sharing and donation, stem cell research and Surgical Sperm Retrieval.

**Key responsibilities – full job description available following application**

- Nurses will be responsible and accountable for assessing, planning and implementing high quality care to meet the individual needs of the patients.
- Will develop skills in the management and care of couples undergoing assisted reproductive techniques.
- Be responsible for the efficient day to day running of the assisted conception unit and for supervising, healthcare assistants and multi-professional students.

**Qualifications and experience**

- 1st level registration with NMC
- Interest in Women’s Health
- Knowledge of change management
- Understanding of clinical governance and audit issues
- Desirable; First degree. Teaching / mentoring qualification. Experience in managing nurse-led practice

**Application details**

If you would like to apply please email your CV, and a covering letter highlighting relevant skills to Chelsea Jones at recruitment@thefertilitypartnership.com by Friday 18th May 2018.
