

Oxford Fertility Patient Price List

Valid from 01st April 2019

FOR A LITTLE HUMAN HELP

**The Fertility
Partnership**

Oxford Fertility

Pre Treatment Assessment – required prior to first cycle for most treatments	
Medical Consultation	£225
Medical Consultation with AMH blood test (result prior to consult)	£260
Anti-Mullerian Hormone (AMH) blood test only	£50
Antral Follicle Count Ultrasound Scan only	£210
HIV, Hep B Core Antibodies, Hep B Antigen, Hep C blood test	£150 (per patient)
Semen Analysis	£195
Advanced Semen Analysis – includes sperm DNA Fragmentation Test	£410
Nurse Planning (including Antral Follicle Count ultrasound scan)	£235
Nurse Planning (does not include Antral Follicle Count ultrasound scan)	£140
Chlamydia	£50

IVF Treatment Cycle	£4,613
IVF cycle Includes all ultrasound scans & oestrogen blood tests, egg collection under sedation, laboratory costs, embryo culture to day 3, embryo transfer, HFEA fee where applicable, one pregnancy scan, follow up medical consultation if within 3 months, one counselling session.	£4,038
Advanced Embryology Blastocyst culture of embryos We aim to culture all embryos to day 5. This is charged in addition to the IVF cycle cost, but will be refunded should culture to day 5 not be achieved.	£575

Does not include drugs (approx. £950 - £2,250).

IVF & Intracytoplasmic Sperm Injection (ICSI) Treatment Cycle	£5,868
IVF cycle Includes all ultrasound scans & oestrogen blood tests, egg collection under sedation, laboratory costs, embryo culture to day 3, embryo transfer, HFEA fee where applicable, one pregnancy scan, follow up medical consultation if within 3 months, one counselling session.	£4,038
ICSI	£1,255
Advanced Embryology Blastocyst culture of embryos We aim to culture all embryos to day 5. This is charged in addition to the IVF cycle cost, but will be refunded should culture to day 5 not be achieved.	£575

Does not include drugs (approx. £950 - £2,250)

Please note IVF Cycles with Genetic Testing do not include embryo transfer & pregnancy scan – see Embryo Storage Cycle

Andrology (Male Services)	
Standard Semen Analysis	£195
Advanced Semen Analysis Sperm DNA Fragmentation Test (includes semen analysis)	£410
Surgical Sperm Retrieval (SSR) Includes sedation Does not include freezing and storage fees	£2,000
Sperm Freezing (per sample)	£150
Annual Storage fee	£350

Frozen Embryo Transfer (FET)	
	£1,995
Includes all ultrasound scans & oestrogen blood tests, laboratory costs, embryo transfer, HFEA fee where applicable, one pregnancy scan, follow up medical consultation if within 3 months, one counselling session	£1,995
Does not include drugs (approx. £320 - £565)	

IVM Treatment Cycle	
	£3,349
IVM Cycle Includes all ultrasound scans & oestrogen blood tests, ICSI, egg collection under sedation, laboratory costs, embryo culture to day 3, embryo transfer, HFEA fee where applicable, one pregnancy scan, follow up medical consultation if within 3 months, one counselling session. Please note specific eligibility criteria apply	£2,774
Advanced Embryology Blastocyst culture of embryos We aim to culture all embryos to day 5. This is charged in addition to the IVM cycle cost but will be refunded should culture to day 5 not be achieved.	£575
Does not include drugs (approx. £220 - £530)	

Gamete Freezing	
Embryo freezing (includes first year of storage)	£900
Egg freezing (includes first year of storage)	£900
Sperm freezing (includes first year of storage)	£500
Annual storage fee (for embryos, eggs or sperm)	£350

Once you have consented to store your frozen embryos, eggs or sperm, every 12 months you will be asked to pay for continued storage. You will receive a letter asking for you to tell us if you want your samples to remain frozen and your agreement to pay for a further year of storage. If you decide to dispose of your frozen gametes, you must indicate this by completing the correct section, signing and returning the form so that it is received **before** the invoice is due.

It is very important that you let us know if your contact details change at any time if you have gametes in frozen storage.

Egg Storage Cycle	£4,038
Egg freezing cycle Includes all ultrasound scans & oestrogen blood tests, egg collection under sedation, laboratory costs, HFEA fee where applicable, follow up medical consultation, one counselling session, freezing of all eggs, one year's storage fee.	£4,038

Does not include drugs (approx. £950 - £2,250)

Egg Thaw ICSI Cycle	£4,090
IVF cycle - Egg thaw Includes scans, blood test, egg thaw, laboratory costs, embryo transfer, pregnancy scan, follow up consultation if within 3 months and first counselling session	£2,260
ICSI	£1,255
Advanced Embryology Blastocyst culture of embryos We aim to culture all embryos to day 5. This is charged in addition to the cycle cost, but will be refunded should culture to day 5 not be achieved	£575

Does not include drugs (approx. £320 - £565)

Embryo Storage Cycle (embryo storage period over 4 months)	£4,613
IVF cycle - No transfer Includes all ultrasound scans & oestrogen blood tests, egg collection under sedation, laboratory costs, embryo culture to day 5, HFEA fee where applicable, follow up medical consultation, one counselling session, freezing of all embryos, storage.	£4,038
Advanced Embryology Blastocyst culture of embryos We aim to culture all embryos to day 5. This is charged in addition to the IVF cycle cost, but will be refunded should culture to day 5 not be achieved	£575

ICSI, if required, will be at additional cost.

Does not include cost of future FET cycle to replace any embryos created.

Does not include drugs for either IVF or FET cycles.

Planned Embryo Freezing Cycle due to medical reasons (embryo transfer is expected to be within 4 months)	£5,163
IVF Cycle	£4,038
Freezing of embryos	£550
Advanced Embryology Blastocyst culture of embryos We aim to culture all embryos to day 5. This is charged in addition to the IVF cycle cost, but will be refunded should culture to day 5 not be achieved	£575

Includes one Frozen Embryo Transfer procedure but does not include the cost of drugs (approx. £320 - £565) which will be charged additionally following freezing of embryos.

ICSI, if required, will be at additional cost.

Oxford Fertility review costs annually. Please ensure that you have the current price list when booking for treatment. Medication costs quoted are offered as a guide only, actual costs may vary depending on individual patient requirements

Intra Uterine Insemination (IUI)	£1,430
IUI cycle Includes scans, blood test, preparation of sperm, insemination, pregnancy scan, follow up consultation if within 3 months and one counselling session	£1,430

IUI with Donor Insemination (DI)	£2,280
IUI cycle Includes scans, blood test, preparation of sperm, insemination, pregnancy scan, follow up consultation if within 3 months and one counselling session	£1,430
Donor Sperm for IUI cycle	£850
Does not include drugs (approx. £320 - £565)	

Ovulation Induction (OI)	£530
Ovulation Induction cycle Includes all ultrasound scans	£530
Does not include drugs (approx. £320 - £565)	

Egg Recipient Treatment Cycle	£8,025
Egg recipient cycle Includes all ultrasound scans and oestrogen blood tests, laboratory costs, embryo transfer, HFEA fee, one pregnancy scan, one counselling session.	£7,000
Advanced Embryology	£575
Waiting List registration – non refundable	£450
Does not include recipient drugs (approx. £270 - £480) Does not include the fee for ICSI if required	

Egg Sharing Treatment Cycle	
Initial Consultation	£225
IVF cycle	No Charge
ICSI (if applicable)	£1255
Advanced Embryology	£575
HFEA fee	£80
Drugs package	£850
Screening test package	£600

Embryo Recipient Cycle	£2,925
Includes all ultrasound scans & oestrogen blood tests, laboratory costs, embryo replacement, one pregnancy scan, HFEA fee, follow up medical consultation if within 3 months, one counselling session	£2,925

Does not include drugs (approx. £320 - £565)

Oxford Fertility review costs annually. Please ensure that you have the current price list when booking for treatment. Medication costs quoted are offered as a guide only, actual costs may vary depending on individual patient requirements

Individual Treatments	Cost per item
Counselling - first session free if in active treatment	£110
Medical Consultation	£225
Repeat Nurse Planning (including baseline scan)	£235
Sedation	£400
Lubion – single vial (only for short protocol - if required) Initial requirement: 21 vials – 3 weeks supply Follow-on supply only if required: further 23 vials approximately	£8.84 per vial
Endometrial Receptivity Analysis (ERA)	£1,250
Donor Sperm	£850
Egg Recipient Trial Cycle	£610
Saline Ultrasound Scan	£450
Gynaecological or Early Pregnancy Scan	£210
HyCoSy	£450

Genetic Testing	Cost per item
Recombine Test – per couple	£900
Sperm DNA Fragmentation Analysis (Comet Assay)	£320
Sperm DNA Fragmentation Analysis (SSR/Oligo Sperm)	£420
Advanced Semen Analysis – includes sperm DNA Fragmentation Test	£410
Y-Chromosome Micro-Deletion blood test	£250

PGD for Single Gene Defects	Cost per item
PGD using Karyomapping for up to 5 embryos Includes biopsy, analysis of up to 5 embryos and storage of embryos for an initial 3 months (storage beyond 3 months will incur the annual storage cost)	£4,716
Additional analysis (per embryo) If more than 5 embryos are to be tested, then each additional embryo will be charged individually	£300

Does not include the cost of the IVF cycle to create embryos or any subsequent replacement cycles.

NB. There is no refund of the cost for PGD if cancelled

PGD for Chromosomal Translocations	Cost per item
PGD using NGS for up to 5 embryos Includes biopsy, analysis of up to 5 embryos and storage of embryos for an initial 3 months (storage beyond 3 months will incur the annual storage cost)	£2,300
Additional analysis (per embryo) If more than 5 embryos are to be tested, then each additional embryo will be charged individually	£300

Does not include the cost of the IVF cycle to create embryos or any subsequent replacement cycles.

Oxford Fertility review costs annually. Please ensure that you have the current price list when booking for treatment. Medication costs quoted are offered as a guide only, actual costs may vary depending on individual patient requirements

PGS using Next-Generation Sequencing (NGS)	Cost per item
PGS with NGS for up to 5 embryos (day 5 blastocysts only) Includes biopsy, analysis of up to 5 embryos and storage of embryos for an initial 3 months (storage beyond 3 months will incur the annual storage cost)	£2300
Additional analysis (per embryo) (day 5 blastocysts only) If more than 5 embryos are to be tested, then each additional embryo will be charged individually	£300

Does not include the cost of the IVF cycle to create embryos or any subsequent replacement cycles.

Thaw / Re-freeze	Cost per item
Thaw / Re-freeze of embryos	£370

Further information to be aware of:

Additional frozen embryos (untested) can be included for analysis and will be charged accordingly. The Thaw / Re-freeze cost will also be incurred in addition to the analysis fee.

If analysis is carried out on less than 5 embryos the cost remains the same. Once the analysis has been completed, we cannot then retrospectively include embryos created in subsequent cycles within this fee. If less than 5 embryos are available, you may choose to delay analysis until embryos are available from further cycle(s) to be analysed together. This option will also incur the Thaw/Re-freeze cost above in addition to the analysis fee.

Other Services	Cost per item
Administration costs for gamete/embryo transport (within UK) <i>excl. courier costs</i>	£150
Administration costs for gamete/embryo transport (International) <i>excl. courier costs</i>	£200
Fees for needles, sharps bin, if required, disposal of clinical waste and for private prescription for treatment medication	£250

Pre-natal Testing and Analysis of Miscarriages	Cost per item
Non-invasive prenatal testing (NIPT) for aneuploidy	£550
Products of conception (miscarriage) analysis	£620

Optional Extras	Cost per item
Embryoscope – Time Lapse Embryo Imaging	£500
Embryo Glue	£200
Endometrial scratch	£300

Oxford Fertility review costs annually. Please ensure that you have the current price list when booking for treatment. Medication costs quoted are offered as a guide only, actual costs may vary depending on individual patient requirements

Blood Tests	Cost per item
Female Hormone Profile with AMH (FSH, LH, Testosterone, Prolactin, TSH, AMH)	£250
Male / Female Hormone Profile – No AMH (FSH, LH, Testosterone, Prolactin, TSH)	£200
FSH	£50
LH	£50
AMH	£50
TSH	£50
Prolactin	£50
Oestrogen	£50
Progesterone	£65
Testosterone	£50
Female Thrombophilia	£425
Beta hCG (two tests required)	£50
Hepatitis B Antigen	£85
Hepatitis B Core Antibody	£70
Hepatitis C	£75
HIV	£50
CMV	£85
Rubella	£50
Chlamydia	£50
Syphilis	£50
Karyotyping	£245
Thyroid Antibodies (TPO)	£50
Cystic Fibrosis	£200
Blood Group/Rh	£50
Zika Virus	£150

Oxford Fertility review costs annually. Please ensure that you have the current price list when booking for treatment. Medication costs quoted are offered as a guide only, actual costs may vary depending on individual patient requirements

CANCELLATION INFORMATION

Occasionally, patients choose to delay the start of their treatment. If this happens, then we will make a refund of any treatment costs minus a cancellation fee. You may, however, incur additional costs should any tests already undertaken need to be repeated when you resume your treatment.

If you should decide not to go ahead at all or if, unfortunately, it is necessary to discontinue treatment for medical reasons i.e. due to poor or excessive response to the treatment drugs, or a coincidental development of a medical condition during the treatment, a cancellation fee will apply.

Full details of the cancellation fees per treatment type are given in the table below.

Cancellation Charges	
Cancelled IVF or ICSI cycle before medication is started	£250
Cancelled IVF or ICSI cycle after one treatment scan	£500
Cancelled IVF or ICSI cycle before egg collection	£800
Cancelled IVM before egg collection	£525
Cancelled IUI / DI cycle prior to insemination	£350
Cancelled FER cycle before cycle / medication is started	£150
Cancelled FER cycle before thawing of embryos*	£500
Cancellation of PGS before biopsy	£525
Cancelled Egg Sharer Cycle (If egg sharing does not proceed)	£1,180
Cancelled ET - Embryos did not reach Blastocyst	£275

* When embryos are thawed in a FET cycle, should they fail to thaw successfully, there will not be a refund.

HOW TO PAY

Payment can be made by credit/debit card or by direct transfer to our bank account. We still accept cash or card payment at the clinic but cannot accept personal cheques or American Express card payments.

PAYMENT TERMS

Please note that we will invoice in advance for your treatment cycle. Payment is required in full before commencing any treatment and we reserve the right to cancel treatment if payment has not been received.

**ONE STOP FERTILITY ASSESSMENT**

We have designed a range of Fertility Investigation packages to suit a range of circumstances. These provide fast, reliable and thorough investigations together with a review by one of our fertility specialists who can then give appropriate advice or treatment.

You do not need to see your GP to refer you. Just contact us for advice on which package will best suit you. Most of the packages shown below require just 1 or 2 visits to the clinic to complete all investigations and consultation, all in a fraction of the time normally needed when undertaken through a GP.

Call us on 01865 782824 or email onestop@oxfordfertility.co.uk to book an appointment.
