

Genetic Testing Price List

Please note that payment will need to be made in full before treatment is commenced.

Pricing does not include:

- The cost of the treatment cycle to create or freeze embryos or any additional services you may need throughout your treatment.
- The additional cost of a Frozen Embryo Transfer cycle to replace unaffected embryos (if not purchased as part of a treatment package)

Please refer to the main price list for information regarding the cost of these.

PGT-A (Pre-implantation Genetic Testing for Aneuploidies - formerly PGS)

Includes biopsy and test and consultant review

Differential pricing according to the number of embryos:

1 embryo	
2 embryos	£600
3 embryos	£1050
4 embryos	£1500
5 embryos	£1950
	£2350

Additional analysis (per embryo)	(per embryo) £300
For additional embryos after the first 5	

PGT-SR (Pre-Implantation Genetic Testing for Structural Rearrangements - formerly PGD translocations)

Includes biopsy of up to 8 embryos	£3400
------------------------------------	-------

Additional analysis (per embryo)	(per embryo) £300
For additional embryos after the first 8	

PGT-M with Karyomapping (Pre-Implantation Genetic Testing for Monogenic Diseases - formerly PGD Single Gene)

Includes biopsy of up to 9 embryos and a non-refundable "work-up" fee of £400	£5,100
---	--------

Additional analysis (per embryo)	(per embryo) £300
For additional embryos after the first 9	

Thaw and Refreeze

Includes thaw and re-freeze of embryos to be tested	(per embryo) £370
For patients who undertake genetic testing after their embryos have been frozen
